Data Platform

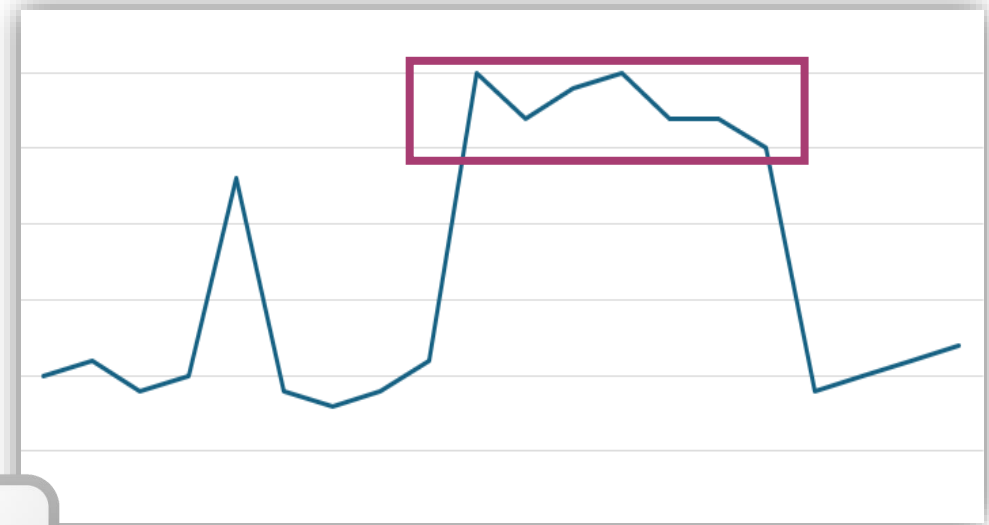

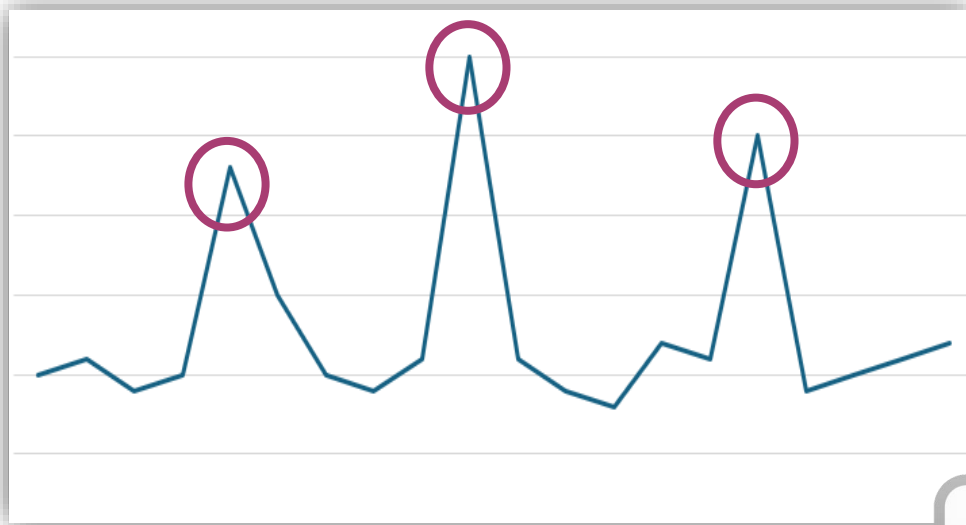

Just so you know...

The Challenge

Attaching Flows

Action	 Bikes_Flow_1
Location	Street × 
Num_Bikes	No_Bikes × 
 Edit action  Test action	

Data in Power Automate

New custom action

Follow these steps to create a custom action that activates a Power Automate flow. [Learn more](#)

Step 1: Define custom action

Action name * ⓘ

Input fields ⓘ

Add

Step 2: Copy connection string

Connection string ⓘ

Paste this connection string in Power Automate flow builder

Step 3: Design and save Power Automate flow

Setup

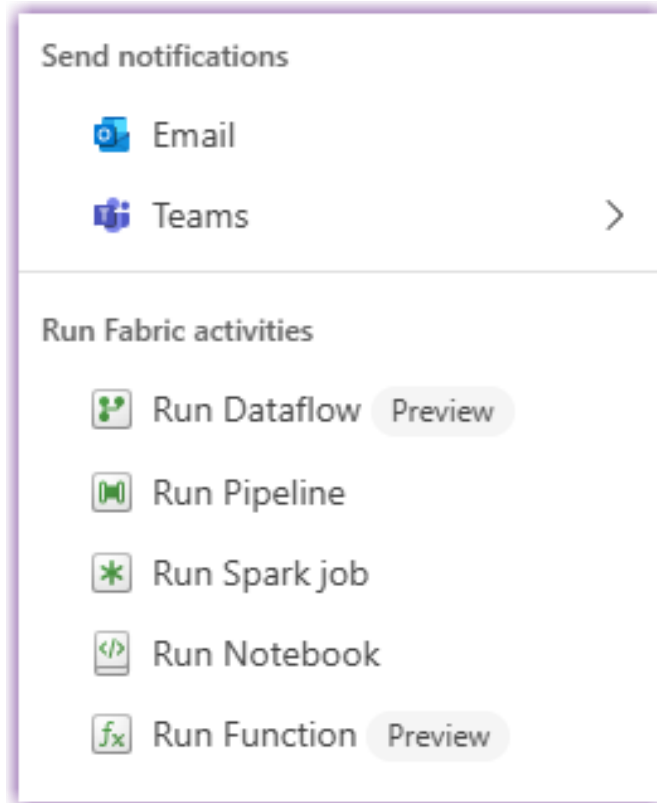

Compose_1

```
{
  "eventTime": "2026-05-06T09:37:18.9340000Z",
  "eventId": "3259d312-bc04-43ff-b78b-80f5ba3e03c9",
  "objectName": "Bikepoint Stock",
  "objectInstanceId": "BikePoints_167",

}
```

Body

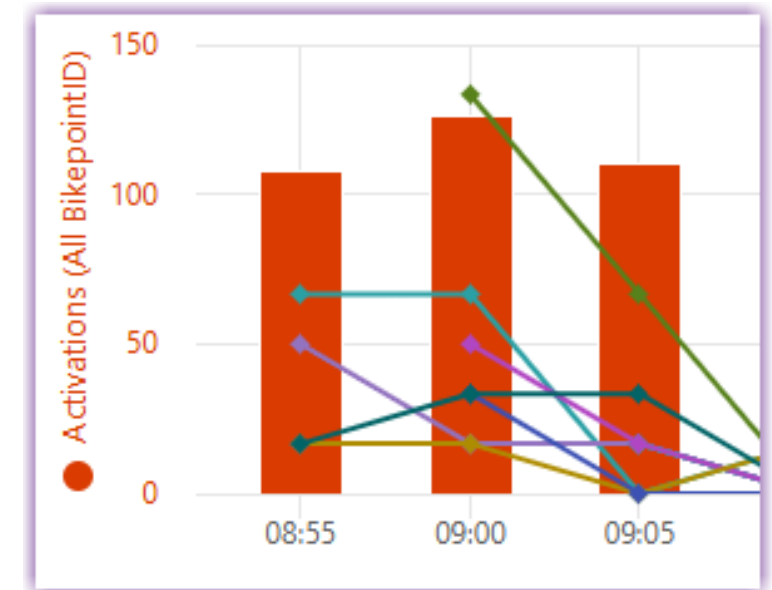

Be Aware

Don't add technical debt
that is not required.

Easy to create 1000s
of activations

Resources

- [Use Custom Actions to Trigger Power Automate Flows - Microsoft Fabric | Microsoft Learn](#)
- [Create Activator Rules - Microsoft Fabric | Microsoft Learn](#)

**Power Automate flows are triggered from Fabric Activator via Custom Actions, not from a Power Automate connector.
Start in Fabric, not the flow designer.**

Thank you
